Gestational and type 2 diabetes - snacks guide (fictional)

Sharma Family Clinic (DEMO).

Healthy snacks between meals
Choose roasted chana, a small handful of nuts, buttermilk, or a fruit such as guava or apple instead of biscuits or sweets. Avoid fruit juice. Pair any fruit with a few nuts to slow the rise in blood sugar.

Evening hunger
If you feel hungry in the evening, a bowl of vegetable soup or sprouts salad is a good choice. Avoid fried namkeen.
